WARNING!

RISK OF DEATH AND SERIOUS INJURY

Whenever you use the RollerSafe products, you risk death or serious injury from loss of control, collisions, and falls. To use RollerSafe safely, you must read and follow all instructions and warnings in the User Manual. However, it is your responsibility to practise safe use of the RollerSafe products in order to reduce this risk.

Always wear a helmet when riding. Use an approved bicycle or skateboard helmet that fits properly with the chin strap in place, and provides protection for the back of your head.

Avoid obstacles and slippery surfaces that could result in a loss of balance or traction and cause a fall.

Pay attention to all warnings and alerts from the RollerSafe products. They indicate unsafe operating conditions. You must learn about and understand the RollerSafe products safety alerts described in the User Manual and respond as instructed.

About the User Manual

You find the User Manual in a separate brochure in the RS Case, on the RS Mobile APP and on www.rollersafe.no

The User Manual is intended to help you set up and use your RollerSafe products. It provides basic information to get you started quickly. For more detailed information, contact RollerSafe AS.

It is important that you adhere to all safety warnings and cautions that appear throughout your RollerSafe product User Manual, and that you use good judgment when you use your RollerSafe products.

Learning to use your RollerSafe products

RollerSafe wants you to be safe and enjoy learning how to use your RollerSafe products. Think about how you learned to ride a bike, drive a car, ski, or do about anything else involving transportation. You probably had somebody help you learn. You started in a safe location. You started slowly. All these techniques apply to the RollerSafe products.

If you carefully follow all the instructions and warnings in the User Manual, and supplementary Safety Video, you should be able to teach yourself how to use the RollerSafe products. We strongly recommend to get support from a more experienced user in the beginning.

Prior to each trip, ensure the tires are well maintained, battery fully charged, and there are no loose components.

Please do not take risks.

WARNING!

All RollerSafe parts must be properly installed. Never attempt to use a RollerSafe product without the RS Brake Technology installed, charged and updated. Using your RollerSafe products without all parts properly installed could damage your RollerSafe products and result in serious injury from loss of control, collisions, and falls.

Do not modify the RollerSafe products. Modifications to the RollerSafe products without the prior written approval of RollerSafe could interfere with the operations of the RollerSafe products, could result in serious injury and/or damage, and could void the RollerSafe Limited Warranty.
